More for your money

The DEVELOP 162F gives you more for your money.

It's more functional, more economical and more practical. Print, copy, scan and fax? You can do the lot with a compact machine that will save you trouble, time and money in a small or home office environment.

How you benefit

> **More functional:**

All the document production functions a small or home office needs – and many more features only normally found in bigger machines, e.g. automatic document feed-in, a wide range of useful fax functions, a manual bypass for non-standard media as well as colour scanning. You can also print straight from your USB stick or scan to a stick or an e-mail. On-going processing of documents has never been easier.

> **More economical:**

Printing, copying, faxing and scanning from a single device means one set of consumables, not four, and that adds up to lower running costs.

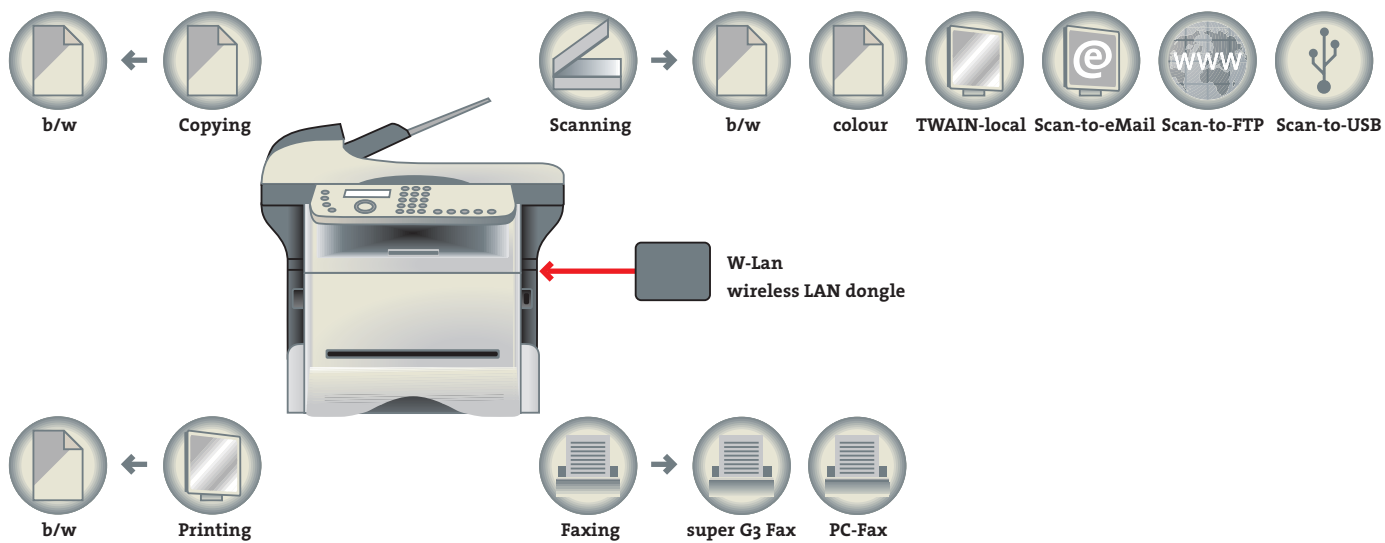

> **More practical:**

Ultra-compact dimensions make this a true desktop device – and the wireless printing option (via a WLAN dongle) means there are no more annoying cables to clutter up your desk. The DEVELOP 162F is also simple to operate and easy to service, e.g. thanks to an all-in-one toner and drum cartridge.
